North Jakarta

Software developer with 3 years building and modernizing core business applications. Fast learner with strong communication skills, adapting quickly to new technologies and translating business needs into reliable software.

Work Experiences

PT. Asuransi Cakrawala Proteksi Indonesia - Jakarta, Indonesia

Dec 2024 - Present

Senior Programmer Staff

- Responsible for developing and enhancing core insurance applications supporting quotation, policy, and operational workflows.
- Partner with stakeholders and end users to gather requirements and deliver end-to-end business solutions.
- Designed and implemented a risk-upload solution that reduced policy-processing activities from hours to minutes.
- Develop and maintain application modules, database objects, background jobs, reports, and internal APIs supporting business-critical operations.
- Building a modern web-based application from scratch as part of the company's initiative to modernize legacy quotation and policy-processing systems.

PT. Asuransi Cakrawala Proteksi Indonesia - Jakarta, Indonesia

Feb 2023 - Nov 2024

Programmer Staff

- Maintained and enhanced multiple core insurance applications, delivering features, fixes, reporting solutions, and operational improvements.
- Collaborated with business users across departments to understand requirements and develop solutions that improved daily operations.
- Investigated and resolved production issues involving internal systems, B2B integrations, data synchronization, and scheduling workflows.
- Contributed to API integrations with external partners, including CARE Technologies, by developing service layers, repositories, data models, and automated jobs.
- Tested and validated high-volume API processes handling hundreds of thousands of records to ensure reliability and data integrity.
- Implemented workflow improvements and automation solutions that reduced manual effort and streamlined business processes.

Education Level

Universitas Indonesia - Depok

Aug 2017 - Feb 2022
